

## Goal

Analyze app types for the purpose of evaluation with respect to their energy consumption and performance from the point of view of a user in the context of internet content platforms on Android

## Question

**RQ1** How does energy consumption vary between native and web versions of the same app?

**RQ1** How does performance vary between native and web versions of the same app?

## Metric

Energy  
consumed  
(J)

Traffic  
volume  
(B)

CPU  
load (%)

Memory  
load (kB)

Frame  
time (ns)
